WELCOME

Welcome to The Holy Earth Foundation

Where the proposals, the procedures and the decks live, how a change travels, and how to answer

A first walk for a newcomer, and for the AI helper beside them. Every slide points at a real page; the deck only shows the order to open them in.

What you will find here

Kind	What it is	Where
Proposals	*should we?* One folder, one page, a PDF beside it	`proposals` (members)
Procedures (SOPs)	*this is how we do it now*, approved versions tagged	public twin · `ops-standard-operating-procedures` (members)
Decks	walk-throughs like this one, for a call or a first look	`.github/decks`
The reading room	one place that gathers what members read	members' room · public room

> Everything The Holy Earth Foundation writes wears the same colour, these four shades, so you can tell whose page it is before you read a word.

Five words, and you can find your way

Word	Means
Repository	a folder that remembers every change and who made it
`preview` **and** `main`	the rehearsal copy and the live copy of the same folder
Promote	the pull request that moves rehearsal to live; a person with the role merges it
Public twin	a public copy that carries only the pages marked public; nobody edits it by hand
Issue	a conversation thread: the easiest way to ask or answer

You never need to type a branch command. You read, you comment, and you say yes or no.

How a proposal reads

1. **TL;DR**: five lines, the only part you have to read.
2. **What is offered**: how things are today, beside what is proposed.
3. **Decisions log**: what was chosen, when, and by whom. Yours stay blank until you choose.
4. **Asks**: usually none, sometimes one.
5. **Sources, and what could not be confirmed**: folded away, never hidden.

Every proposal comes as a **PDF for your eyes** and the **markdown it was made from** for your helper's. Start with **000 Start here** in the foundation's `proposals`.

Procedures: how we do it now

- A procedure is named `SOP-<Department>-<ID>-<name>`: `SOP-OPS-001` is the first operations procedure.
- It is a **draft** until the officers tag an approved version; the tag is the approval.
- Each one opens with a badge row: the number in **The Holy Earth Foundation's colour**, its status, the date it last changed, and **For** in the slate every organisation shares.
- Every procedure is also a PDF, rendered on each push.

> Read **SOP-OPS-001 "How a change travels"** first. It is the road on the next slide but one, in full.

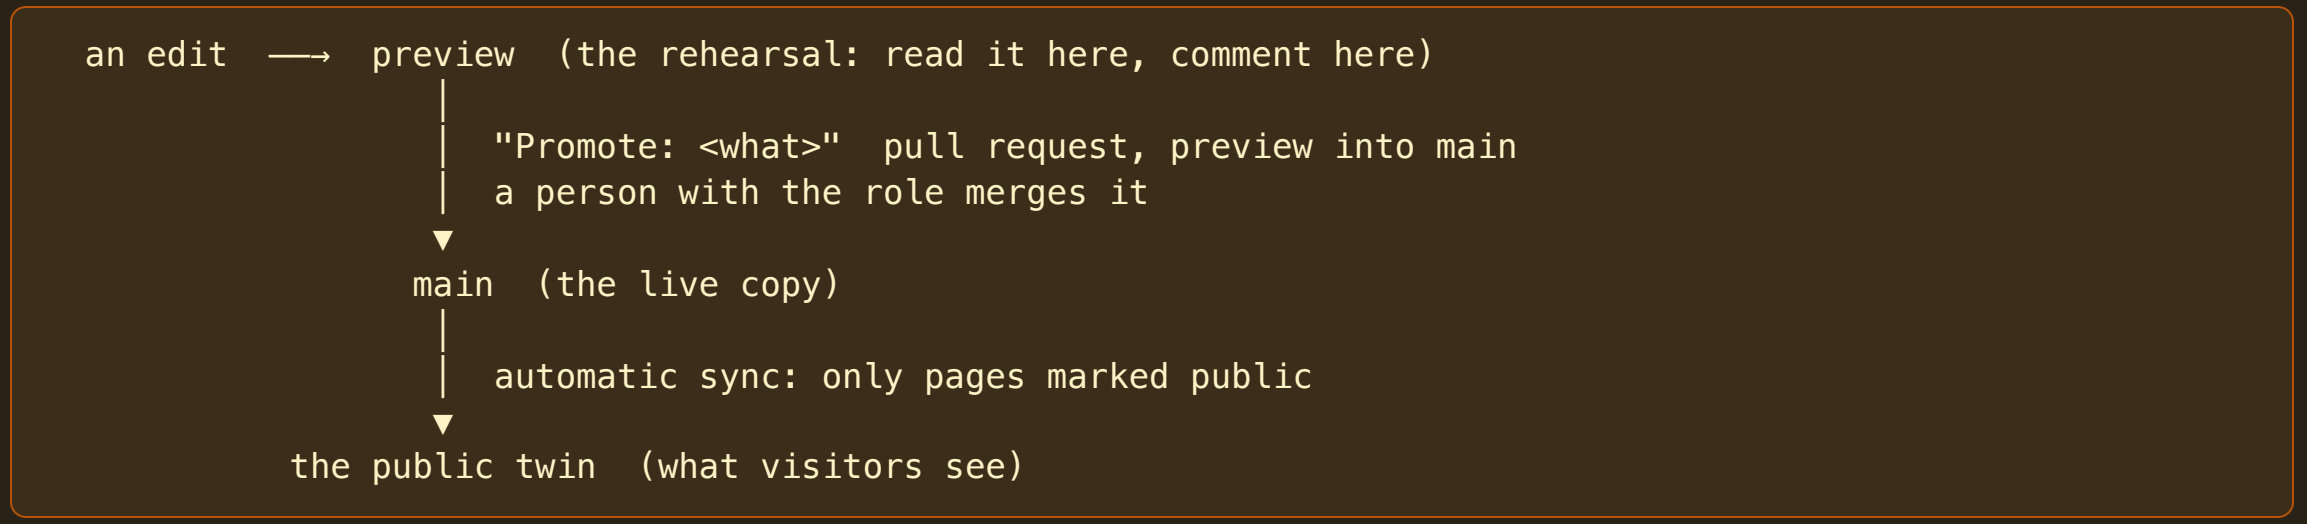

The procedures visitors may read: `ops-standard-operating-procedures-public`. Members read every draft in `ops-standard-operating-procedures`.

The reading room, and your helper

- The reading room gathers what members read: proposals, procedures and decks, each as a page and a PDF. Open `reading-room` while signed in to GitHub. What is ready for visitors is in the public room.
- It is for members. If the link shows **404**, you are signed out or not yet in the readers team: ask a steward, through an issue on the foundation's `.github`.
- **Your helper** (Claude, ChatGPT, any of them) can read the same pages once it is connected with your permission, never more than you can. Point it at the markdown, not the PDF, and give it the welcome for your helper (it opens for signed-in members).

> A good first question for your helper: "*Read 000 Start here and tell me what is waiting for my answer.*"

The road a change travels

- If a link to `main` still shows old words while someone says the change is done, it is on `preview`: the Promote has not been merged yet.
- A page that is not marked public never leaves the private repository, on any branch.

How to answer

You want to…	Do this
say yes, no, or "not yet" to a proposal	open an **issue** titled with its number, or ask a steward to note it in the decisions log
comment on a change before it goes live	comment on the **Promote** pull request
ask a question about a procedure	open an issue in the procedures repository, naming the SOP
ask your helper to answer for you	let it draft; **you** read it and post it under your name
get access, or more of it	ask a steward, through an issue on the foundation's `.github`

> There is no wrong door. A question in the wrong place gets moved, not lost.

Who to ask

a steward, through an issue on the foundation's `.github`

- for access to the reading room, the proposals or the procedures
- when a link shows 404, or a page looks out of date
- when you are not sure where an answer belongs

Where to start next: **000 Start here** in `proposals`, then **SOP-OPS-001** in the procedures, then the reading room. Visitors: the public room.
